

SiliconSystems Signs Distribution Agreement with Falcon Electronics

HAWTHORNE, Calif., March 1, 2004 -- SiliconSystems, Inc., a leading provider of solid-state storage solutions to the Enterprise System OEM market, today announced the signing of a distribution agreement with Falcon Electronics, Inc., based in Huntington, New York. Falcon is one of the nation's leading SDB-classified businesses created to professionally service the avionics, military, and space industries.

“SiliconSystems’ high performance solid-state storage systems represent an ideal complement to Falcon’s current line card of equipment providers,” said Michael Hajeck, SiliconSystems’ CEO, in announcing the alliance with Falcon. “Importantly, with SiliconSystems based in California, the Falcon sales network throughout the United States will permit SiliconSystems to accelerate its nationwide sales and marketing program into the avionics, military and space industries.”

The Distribution Agreement provides for Falcon to represent SiliconSystems’ complete product line of solid-state storage solutions throughout the U.S. Falcon’s expertise is servicing government contractors, a major market of interest to SiliconSystems.

About SiliconSystems

SiliconSystems, Inc. designs, manufactures, and markets solid-state storage solutions based on its patented and patent-pending SiliconDrive™ technology. The company provides a comprehensive product line of solid-state storage solutions with an exclusive market focus on the high performance and high reliability Enterprise System OEM market.
